

Landmark Academy K-12 Online Program:

Mrs. Wilton or Mrs. Hall would be happy to discuss Online Learning further with you through email or phone call.

The virtual program we offer is completely on an online platform – Odysseyware (OW). All the learning, assignments and assessments for classes are through that platform. All the work would be done at home online. This link has videos regarding the parent portal and an introduction to the OW platform: <https://www.odysseyware.com/training-resources/parents> . Our program director, Mrs. Hall, is available for questions and assistance. Her email is halls@landmarkacademy.net.

The only time the student would come to the school is to set up the program in the fall to ensure they know how to login and communicate with Mrs. Hall and then if they need direct tutoring. They may also have to come to the school for State testing (MSTEP) one or two days in the spring.

Our online program is the direct teacher for the students. We offer support for our students through our certified teachers at the school. They can get assistance from our staff when it is needed. Grading is done by our program coordinator. The workload is the same number of classes that they have at school. Each student works through their assignments at a different rate. The students do take a pretest at the beginning of the unit and then only work on the learning targets that they do not pass on the pretest. Students can come back into the classroom setting if you choose this option. The easiest times to do this would be at the beginning of a new term due to grading.

Students who are full time students can participate in any Landmark Academy sport or club.

This is a brief overview of the programs. If you would like more information or to discuss this further contact Mrs. Hall at the email above or Mrs. Wilton at wiltond@landmarkacademy.net.
